DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

> The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 5-7,13-15, and 19-22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 5, 6, 13, 14, 19 and 20 contain the limitation "or combinations thereof." This limitation is considered indefinite since it does not clearly define the metes and bounds of the claim.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

> (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

4. Claims 1, 3-29, 32 and 33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Brockenbrough et al.

Re claims 1-16, 18-22, and 29-33 Brockenbrough et al. discloses an article of manufacture, comprising: an energy absorber (14, 16) comprising a first layer having a first plurality of corrugations, wherein the length of the corrugation is longer than its widest cross-sectional width. However, Brockenbrough does not teach wherein the

energy absorber is made of extruded plastic. Weylgan et al. teaches a corrugated energy absorber made of extruded plastic. (Figure 7, Column 10, lines 28-36). It would have been obvious to one of ordinary skill in the art at the time the invention was made to have used plastic in the invention of Brockenbrough et al. in order to provide a less-expensive, lightweight material in the article of Brockenbrough et al.

Re claims 17, 23, 24-28, Brockenbrough et al. does not teach wherein the first and second layers differ in composition. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have provided the first and second layers of different composition since applicant has not disclosed that having different compositions solves any stated problem or is for any particular purpose and it appears that the invention would perform equally well with a variety of different compositions such as metal or plastic.

Response to Arguments

5. Applicant's arguments filed April 14, 2005 have been fully considered but they are not persuasive.

Applicant argues that the rejection under 35 USC 112 2nd paragraph is improper. The examiner maintains that "or combinations thereof" does not sufficiently describe the metes and bounds of the claim since it is impossible to determine what Applicant intends to claim with such a limitation. The rejection is maintained.

In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, it is extremely well known in the art that plastic can be substituted for metal for many reasons including cost and weight reduction. Motivation to combine can come from the teachings of the prior art, **the knowledge of persons of ordinary skill in the art and/or the nature of the problem to be solved**. (In re Rouffet, 149 F.3d 1350 U.S.P.Q.2d 1453 Fed. Cir. 1998) Further, it has been held that it is within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice (In re Leshin, 125 USPQ 416) Therefore, the rejections above are maintained.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
